We the undersigned want to see **Leeds Kirkgate Market** survive and thrive in its current form and call for present and future councillors to make a commitment to:

- Significant reduction to market traders' rents - agreed in consultation with traders
- Substantial investment over the next five years, including full repairs to the roof of the whole market
- Ensure involvement of traders and greater transparency in all aspects of market management, starting with traders having a say in the recruitment and appointment of a new market manager.
