Who We Are

We are a workers cooperative- a non profit company run by disabled people. Our mission is to employ disabled people providing high standards of employment and offering pay above the national minimum wage. We are run by a board of non paid Founder Members and we are supported by Trade Unions, several companies and individuals.

What's different about us?

We care about the environment therefore we use only recycled materials. All the timber, hardwood that we use is what other manufacturers would normally throw away. We collect their wood waste and make our beautiful products. There is nothing we cannot use! Even some of the screws used in our products have been recycled!

We are proud that we not only recycle wood but we help others to be green!

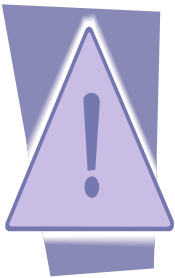

Our Products

All our products are made out of recycled wood. Our production itself generates very little waste. Even the clean saw dust is sold for animals and domestic use!

By buying our products you not only support the employment of disabled people but join us in the recycling process and save our forests.

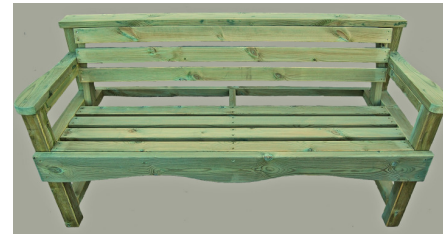

www.yorkdwc.co.uk

And remember...Our timber comes from forests which come under the Forest Stewardship Council (FSC) which is an international non-governmental organisation which promotes responsible management of world's forests.
